

## SecureData Lab Access Agreement and Confidentiality Commitment

### I confirm that I:

- Am familiar with the technical and organizational measures (TOM) published on the website of SecureData Lab to ensure and maintain data security in the SecureData Lab.
- Am in an active employment or student or an equivalent relationship with the scientific institution specified in the research project.
- Keep the personal access data assigned for two-factor authentication (password and security code) confidential, do not disclose them, and protect them from unauthorized access.
- Use the access exclusively for the research project approved within the SecureData Lab and not for any other permissible and lawful scientific purposes.
- Comply with all confidentiality obligations, especially the statistical confidentiality according to [Principles for Securing and Providing Confidential Statistical Data](#), all data security measures of the General Data Protection Regulation, and all data protection requirements, and commit to absolute confidentiality regarding all data accessible to me during my scientific activities.
- Do not alter the configuration of the provided statistics program for logging work steps or the log files generated by the respective statistics program.
- Do not allow other persons to access or become aware of the data, nor make the data accessible to others.
- Do not use any screen capture functions, screen sharing, video conferencing tools, or similar procedures during access.
- Do not copy, photograph, transcribe, or otherwise make the provided data available outside the access point in any way (e.g., by taking written notes).
- Never attempt to re-identify statistical units.
- Do not use the internet for other purposes during access.
- Do not use other media and information sources during access.
- Ensure that the source code used for conducting the research project supports an automated control of confidentiality maintenance through appropriate routines, particularly the implementation of case counters.
- Ensure that in the event of my departure from the scientific institution specified in the research project or from the research project itself, this is reported to the SecureData Lab.
- Ensure that the results of the research project do not allow conclusions about individuals, even through indirect identification.

### I am aware that:

- The criminal provisions art. 283 and 374 of act No. 300/2005 Coll. the Criminal Code regarding the observance of statistical confidentiality apply to me and my scientific activities in the SecureData Lab.
- Violations of the above obligations can lead to appropriate legal, including criminal, prosecution and may result in liability for damages.
- In the case of misuse of the accessible data, the calculated results cannot be used further, and access to the SecureData Lab will be blocked.
