Anotácia projektu:

The project attempts to address existing fragmentation in the levels of knowledge regarding social enterprises (SEs), from both a geographical and a disciplinary point of view, as well as from the perspective of different categories of stakeholders. The Action will implement networking mechanisms to connect fragmented communities and to contribute to closing the gap between the scientific community, policymakers and society throughout Europe and beyond. These networking mechanisms include working groups, conferences, seminars meetings, workshops for policy-makers, local stakeholder talks, short-term scientific missions, training schools, communication tools including stakeholders briefs, and web-based dissemination.
