

Obtaining a joint diploma from both partner universities will help you to differentiate from other competitors in finding a job.

An interesting new type of study program using a holistic approach to education.

Wide possibility of further profiling of students through elective courses offered by both universities in English.

Start your career with study of Global Finance and the world for you will never seem big enough!

Why invest in the Southeast Asia region?

What are the specifics of the financial markets in this area?

What opportunities do companies operating in the Southeast Asia offer for graduates from abroad?

The study program, co-operated with International College, the National Institute of Development Administration (ICO NIDA) in Bangkok (Thailand), focuses on current global challenges in finance, economics and management. The program provides to students not only theoretical knowledge but also practical experience and skills, including the development of emotional intelligence, language and intercultural skills. The study is particularly suitable for initiative students who want to acquire something more during their university studies and create the preconditions for successful enforcement in their future professional careers.
