International Finance MASTER STUDY PROGRAM

CORE COURSES

- Capital Structure of Companies
- Analysis and Prognosis in Finance
- Financial Control
- International Taxation
- International Finance
- Financial Programming
- Valuation of Financial Assets
- Financial Accounting
- International Financial Centres
- Financial Econometrics
- Risk and Uncertainty in Finance

A world career in finance without any borders.

Will Facebook ever pay a dividend and how it can affect the stock's value?

If you invested \$1,000 in first Tesla shares, how much would you worth now?

Why pension funds do not purchase shares of insurance companies?

The study program supports the critical thinking that is necessary to understand economics and international finance. We want you to create learning experience to have unique and detailed understanding of finance models and theory that equips you with the skills needed for formulating convincing and professional arguments to explain the context in international finance based on the knowledge gained during study. The curriculum is focused on practical panel data mining and data analyzing, methods and relevant models that are highly valued by employers at international level.
